## Our sustainability commitment

We are constantly committed to **environmentally friendly travel programmes** that provide our partners with authentic travel experiences while minimizing the impact on the environment and supporting small local businesses.

Even in our daily office routine, we focus on **sustainability**: no plastic consumption, recycling paper for our publications and digital travel documents.

Italy is our home and a popular destination that enchants tourists from all around the world. A **natural wonderland** we want to **cherish** and **protect** to ensure that today's and tomorrow's travellers keep on being fascinated by the extraordinary biodiversity of our peninsula. For this reason, we chose to embark a journey towards environmental responsibility with **WOWnature**. It's an initiative that allows people and businesses to **plant new trees** and protect forests. Michelangelo Travels decided to contribute to plant new trees in two areas of Veneto and Lombardy with **unique landscapes to be preserved**.

Therefore we would like to gift you, as our partners, with one tree on your behalf for every ten trips you take, allowing all of us to contribute to the environmental protection of Italy.

*Lio Piccolo*

Together we will plant trees in two incredible locations:

## **LIO PICCOLO | Venice Lagoon**

One of the most unique environments you can find in the Venice lagoon. One of the most impressive landscapes in Veneto, where we participate in planting new trees typical of the northern Venice Lagoon area, such as tamarisk and juniper.

## **TORBIERE DEL SEBINO | Lake Iseo**

A fascinating nature reserve with reed belts and waters surrounded by cultivated fields. It is considered a priority area for biodiversity due to the variety of habitats and plants present.

## **What is activo?**

Our activo tour programme has been developed over 15 years as an addendum to our classical tour programmes, and has become a key component of our business mix. The product is designed for those who want to experience their holiday in a different, more active way, wishing to experience Italy close up as you can only do when travelling under your own steam.

You can discover and enjoy the real delights of Italy and her neighbouring countries on our activo packages. Enjoy this easy-paced tourism, far away from the travelling hordes, either on foot or on two wheels.

There is no better way to get to know those quaint corners of the country at first hand than on an activo break. You can appreciate the local cuisine and take in the unique atmosphere and ambiance of the contrasting towns and villages at your own speed.

## **Who is activo suitable for?**

Activo is a product designed for those seeking a holiday full of diversity, and is suitable for all ages. These are trips where you can discover new routes away from the crowds of the tourist hotspots. We produce an experience which combines a positive sense of wellbeing through movement with the enjoyment of discovering regional cuisine, attractive landscapes and cultural sights in one tour.

## **So how does it work?**

Your guests will head out each day to discover the true beauty of their chosen destination - be this on foot or on a bike.

The trips are suitable for everyone and anyone can take part! Our tours are led by experienced hiking or biking guides. For those who prefer less effort on two wheels our E-Bike-holidays provide the hire and transportation of these energy saving e-bikes on the various excursions.

## **What benefit does activo offer your business?**

Our activo product enables you to target new segments of the market which may otherwise have been closed to you. The active programmes can be offered to clubs, societies or corporations who are looking for an interesting group activity for their members and employees.

## Hiking tours

These enjoyable hiking tours take in some of Italy's and her neighbour's most beautiful places. The hiking excursions are suitable for all who enjoy walking and are led by an experienced hiking guide.

## E-Bike tours

Taking a bike ride through wonderful countryside with the assistance of an electric motor makes the journey that bit more fun.

Get on board the e-bike bandwagon with us and appeal to new markets. We look after all the details for you - from the careful planning of the routes through to the provision of the e-bikes.

**All our e-bike tours may equally be undertaken with your own bikes, coaches and trailers.**

## Symbols

Alongside the descriptions of the daily itineraries you will find symbols which indicate if the tour is intended by bike or on foot. On some days no coach travel at all is needed, as shown by the appropriate symbol.

-  No coach required
-  Effective hiking time, not including any breaks
-  Vertical height difference between the highest and lowest point on the route
-  Distance to be covered by bike

### Hiking excursions

-  The hiking component is easy. The average time spent walking is under 3 hours.
-  The hiking component is moderate. The average time spent walking is up to 4 hours, with some steeper sections.
-  The hiking component is moderate to demanding. The average time spent walking is more than 4 hours with multiple steeper sections.

### Cycling excursions

-  The average tour length is around 40km with gentle gradients. The degree of difficulty is described as easy.
-  The average tour length is around 50km with some more challenging gradients. The degree of difficulty is described as moderate.
-  The average tour length is in excess of 60km and includes some quite steep inclines to negotiate. The degree of difficulty is described as demanding.

**Please bear in mind that tours which may be described as easy or moderate on an E-bike could be classed as demanding on a regular bike.**

 **incl. coach** All our prices show two separate rates. This symbol indicates that all ground transport, city permits and parking fees are included in the package-prices (according to the scheduled programme).

# What you need to know

## Day hikes

Hiking between excursion points brings you closer to nature than pretty much any other type of travel and gives you an incredible insight into the regions and their people.

The chosen hiking paths are usually very well maintained and are often also used by the locals.

They are set away from roads and thus enable you to experience the broad range and beauty of the fauna and flora. Our day hikes last between 2 and 5 hours. In order to help you make informed choices, we provide details relating to the relative intensity of each one.

## Bike routes

Our programmes are designed for anyone who enjoys riding a bike and no special training is required by way of preparation.

The majority of our tours take place either on dedicated cycle tracks, well prepared gravel paths or minor B-roads with little traffic. Only in rare circumstances would we ever need to use busier routes. The bicycles that we hire are appropriate for the excursions envisaged.

## Vertical height difference

We also indicate on each tour the vertical height difference that you will need to negotiate.

The figure shown indicates the difference in height between the highest and lowest point on the daily excursions. Where the difference is less than 50m, we indicate this as negligible.

## What happens if it rains?

In case of bad weather your guide will amend the programme accordingly. If the rainfall is particularly intense it may be decided to shelve that day completely and plan in different routes or activities. We always prepare for such eventualities and offer interesting alternatives in this case.

## What to wear and eat

We recommend sturdy hiking boots which cover the ankles with good rubber soles and comfortable practical clothing. We suggest dressing in layers in order to add or remove them according to the conditions. Consider also both rain and sun protection. For the bike tours, whilst we do recommend the use of appropriate cycling trousers and gloves, this is not essential, however for insurance reasons we must insist that all participants wear a helmet. Panniers, helmets or any other pieces of equipment are not included in the package price. They are available on request. We do recommend that hikers and bikers take a hearty breakfast each day and that they take adequate supplies of water with them. A small rucksack is therefore an excellent idea.

## Hike and bike guides

Our hike and bike guides are known for their technical competence, sense of responsibility and their knowledge of the area. Our local partners are reliable and experienced people who are always on hand for you. They look forward to showing you the beauty of their areas. They possess excellent knowledge of the routes and will provide you with interesting information about the places you will encounter during the excursion.

## Coach trips and cycle transportation

Where the itinerary demands it, you can expect to spend some time on a coach to reach the departure point. The longest transfers usually take up to 1 hour. Should you arrive by air or rail, we will provide a local coach to facilitate the excursions selected as required. In the case of E-bike trips we look after the hire and transportation of the E-bikes for the specific tour, the cost of this being included in the tour price.

## Hotel provision and board basis

Each of our tours provides either comfortable 3\* or 4\* hotel accommodation as standard.

Extended breakfasts and good quality and filling evening meals are of course also included. Each of our tours will offer you then chance to incorporate either lunch in a restaurant, a picnic lunch or a snack en route. These breaks are an integral part of the tour and allow you not only to rest and recover, but also get a real insight into the local cuisine which is often deeply rooted in the farming culture.

The most important rediscovery since the Riace bronzes found in the Mediterranean in the 1970s!

The ground-breaking archaeological discovery of 24 bronze statues in perfect condition in San Casciano dei Bagni, a spa town in the heart of Tuscany, offers Michelangelo International Travel the marvellous chance to promote culture by supporting this incredible discovery.

Culture is an important growth engine and any help in this field is an important investment in everyone's future.
